```
Start doing Game Manager Class, including startGame(), cardDistribute().
Also, Card class and DBConnected class were created with the function of
randomCard().
```

18/01/2020 LOG

Guodong Yang

```
Focus on gameOrStatistics(), statistics(), infoRecord(), winOrOut(),
endGame().
```

Guodong Yang

```
Based on MVC structure, a package named view was created with a
CommonLineView class in it.
The CommonLineView class contains the following methods:

    1. gameOrStatstics() //The view of asking user whether playing a game
or showing the past game statistics

    2. numOfAi() //The view of asking user to choose how many AI players

    3. statstics() //The view of past game statistics

    4. roundStart() //The view of the round started

    5. selectCategory() //The view of game results

    6. endGame() //The view of displaying players' final score
```
